

THE PRODUCTION AND VALUES OF HORTICULTURAL PRODUCTS
FOR NAPA COUNTY -- SEASON 1924

<u>KIND</u>	<u>TONNAGE</u>	<u>VALUE</u>
Apples	585	37,000.00
Cherries	328	92,000.00
Grapes	17,750	1,300,000.00
Pears	2,630	157,000.00
Prunes	8,750	1,050,000.00
Miscellaneous kinds (Estimated)		<u>50,000.00</u>
		\$2,686,000.00

In the above figures, the tonnages are taken from the record of shipments and do not contain estimates. The values computed are taken from the average prices secured by the various marketing agencies, and are the net returns to the grower.

In comparison with the last two years, the net values are favorable. The 1922 crop was worth \$3,308,000.00 and the 1923 crop was worth \$2,225,000.00.

Apples and cherries were the poorest crops, both in tonnage and returns, being about 40% of normal.

It is of interest to note that with a 50% grape crop, we moved as many tons and received slightly more money than ever before. This is the first season that the entire grape crop of the county has been shipped.

The pear growers enjoyed a profitable season, although the crop was below normal. The computations above include 750 tons which were drying stock.

The 1924 season was dry, but otherwise favorable. No unusual losses were sustained by weather conditions, insect pests, or diseases.
