This project focuses on reducing flood damages for properties along Milliken Creek between Atlas Peak Road and Westgate Drive. During the 2005 flood, several homes suffered flood damages. Project is being coordinated with Silverado Resort and the Kaanapali Dr. Home Owners Association.

The project is under construction and will be completed in FY 17/18.
The Oakville Cross Road to Oak Knoll Project is the downstream continuation of restoration of the Napa River from the Rutherford reach. This project encompasses approximately 9.5 miles of the river. The conceptual design was completed in the Fall of 2010, and a project environmental review was completed in 2013.

Total project cost is $21,200,000 includes $15,100,000 expected to occur within the current 5 year CIP time frame, plus $6,100,000 in prior year expenses.
