September 29, 2022

To Residents and Business Owners on Old Sonoma Road, Buhman Avenue, Old Sonoma Highway, Congress Valley Road and Sunset Road:

Re: 2022 Napa County Seals Project notice of upcoming Microsurfacing:

   Thank you for your patience in our construction project. We appreciate your cooperation, and will continue to work diligently to complete the work on your streets. For convenience the current schedule is below, but please note that the schedule is subject to change.

THE CHIP SEAL OPERATION IS COMPLETE

   The application of chip seal is complete on your street. Some shedding of the aggregate is normal and this will be swept prior to the Microsurfacing operation. Please continue to drive cautiously on the chip seal as this will allow the new surface to continue to cure and the reduce the rocks from loosening.

MICROSURFACING IS NEXT:

   CAUTION: DO NOT DRIVE THROUGH THE WET MICROSurFACING!

   The Micro Surfacing is "wet" when it is laid, and MAY take three to four hours of drying time before it can be driven on or walked on without sticking to your vehicle/feet. For a few days following the resurfacing, please drive at reduced speeds and avoid sharp turning movements to allow the new surface to fully "set." Please avoid turning your wheels while your vehicle is not moving, as the twisting of the tires can tear the new surface.

   Failure to obey traffic control signs/devices may result in damage to your vehicle with repairs at your own expense. Please do not operate sprinkler systems or drain water of any kind onto the street the day before, the day of, and the day after application of the Microsurfacing. If your street is scheduled for Microsurfacing on a trash pick up day, please put your cans curbside the night prior to allow for an early pick up. Your service will not be affected.
For the latest schedule please go to:

Note: The schedule above is subject to change, please check website for latest schedule

The limits and traffic restrictions for each segment are as follows:

**Segment A.**

**Limits:**

All of Congress Valley and all of Sunset Road.

**Traffic Restrictions:**

- A pilot car will guide local traffic.
- The south side of Congress Valley will be microsurfaced first and possibly blocking off driveways from 8 AM to noon.
- The north side will be microsurfaced second and possibly blocking off driveways from Noon to 4 PM.
- Congress Valley will be closed to through traffic for this work.
- Barricades allowing for local traffic only, will be placed at the intersections of:
  - On Thompson Avenue at the intersection with Congress Valley
  - On Congress Valley at the intersection with Old Sonoma Road
  - On Congress Valley at the intersection with Buhman Road.
Segment B

Limits:

Old Sonoma Road from Highway 12/121 to Dealy Lane.

Traffic Restrictions:

- A pilot car will guide traffic.
- Use Old Sonoma Highway to go west on Highway 12/121.
- There will be no access to east bound to Highway 12/121.
  - To head east on Highway 12/121 use Highway 29
- No south bound traffic will be allowed on Old Sonoma Road, south of Old Sonoma Highway.
- Please see “Segment B Traffic Control” for illustration.

Segment C

Limits:

Old Sonoma Road from Dealy Lane to Buhman Avenue,
Old Sonoma Highway from Highway 12/121 to Old Sonoma Road.

Traffic Restrictions:

- A pilot car will guide local traffic.
- Dealy Lane will be closed at the intersection with Old Sonoma Road, use alternate routes.

Segment D

Limits:

Buhman Avenue from Old Sonoma Road to the Napa City limits.

Traffic Restrictions:

- A pilot car will guide traffic.
- The following roads will be closed, use alternate routes
  - Congress Valley at the intersection with Buhman
  - Henry Road at the intersection with Buhman

Segment E

Limits:

Old Sonoma Road from Buhman Avenue to Congress Valley Road.

Traffic Restrictions:
• A pilot car will guide traffic.
• Buhman will be closed south of the intersection with Henry, use alternate routes.

Segment F

Limits:

Old Sonoma Road from Congress Valley to City of Napa Limits.

Traffic Restrictions:

• A pilot car will guide traffic.
• Congress Valley will be closed at the intersection with Old Sonoma, use alternate routes.

FREQUENTLY ASKED QUESTIONS (FAQs)

What will the construction process involve and how will the streets be improved?
A microsurfacing will be applied to give the road a hard and smooth surface similar to asphalt.

How will the work affect me?
Street parking will be affected several times for prep work and paving. During these activities, the affected street(s) will be closed from approximately 7 a.m. to 5 p.m. The contractor will place barricades and signs informing residents of dates and times of no parking. Will any vehicle left in areas of no parking will be towed at owner’s expense. You will not have vehicle access to your driveway during that time. Pedestrian access will be limited for up to 4 hours after placement of final microsurfacing but maintained at other times.

What about garbage pickup, mail delivery, or other services?
Street resurfacing is coordinated with the postal service, garbage haulers and other service providers. In most cases, you will not experience any service interruptions. Put garbage cans out early on your regular collection day, preferably at the edge of your driveway rather than in the street. Garbage haulers and mail carriers will work around the paving operation to provide service, however, it may not be at the usual time of day.

What if there is an emergency?
Should an emergency arise, emergency vehicles will be given access to the affected street.

What if I need to drive somewhere?
Park your vehicle on a nearby street that is not being resurfaced. Check the area signage to plan your route and where to park. The streets are phased to provide room for parking on adjacent streets.
What can I do to make the work go smoothly?

Plan ahead on where you will park and how you will get in and out of your property. Park on nearby unaffected streets if necessary. Try to schedule any visitors and deliveries outside of the notified work hours.

Whenever possible, avoid construction areas and use alternate access routes.

Keep your young children and pets away from the street while we are performing these treatments. Several large pieces of equipment are involved.

Check your shoes before walking into your house. Loose rocks can be picked up and tracked onto carpets or scratch wood floors.

Drive slowly; the new pavement can be slippery.

Continue to park your car off your street or cover it until the initial sweeping is completed. Loose rock thrown up by speeding vehicles could damage your car's paint.

The County acknowledges that this work may cause an inconvenience to motorists and appreciates the patience of the surrounding community. Please contact James Reese, Project Manager at James.Reese@countyofnapa.org or (707) 259-8281 if you have questions or need additional information.

Regards,

James Reese, P.E.
Project Manager
