

Prevent the introduction of pests into Napa County

INSPECT ALL INCOMING GRAPEVINE NURSERY STOCK

Call Us

Contact the Agricultural Commissioner's Office any time you receive a delivery of green growing grapevines or landscape plant material at **(707)253-4357**; inspectors will look for glassy-winged sharpshooter life stages.

Train Employees

Train field crews to recognize signs of pest infestation.

When doing a quality check of vine roots, leaf color and graft union, take a look under the wax for mealybugs.

Follow Up

If you see any signs of pests, contact your nursery and the local Ag Commissioner's Office or UCCE Viticulture Farm Advisor.

Maintain good communication with your nursery stock supplier; ask about their pest management strategies.

Help us to help you protect the winegrape industry in Napa County!
